## DETAILED ACTION

### *Allowable Subject Matter*

1. Prosecution on the merits of this application is reopened on claims 28-34 considered unpatentable for the reasons indicated below:

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 28, 31-32, 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Marotta et al. (6,697,283).

Regarding to claims 28, 31-32, 34, Marotta discloses a system for sensing a memory cell comprising a memory cell comprising temperature-dependent behavior (136); a current sensing amplifier (105) coupled with the memory cell; a temperature-dependent reference current source (300) operative to generate a temperature-dependent reference current comprising a positive temperature coefficient; wherein the current sensing amplifier compares the temperature-dependent reference (Iref) current to current sense back from the memory cell (Isense) during a read operation to determine whether the memory cell is programmed; wherein the memory cell

comprise a write-many, nonvolatile memory cell and two dimensional array. *See Figs 1-3A; Cols. 4-8.*

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 30, 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marotta et al. (6,697,283) in view of Bosch et al. (6,424,581).

As per above discussion, Marotta et al. disclose the claimed invention but lack an inclusion of wherein the first memory is a three-dimensional array with write-once memory cell. However, Bosch et al. disclose a three-dimensional array with write-once memory cell (12). It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Marotta et al.'s memory array by utilizing Bosch et al.'s teach to provide high-speed and cost-effective semiconductor memory device. *See Fig. 1.*

### ***Allowable Subject Matter***

4. Claim 29 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
